

TREBI LTD has been founded in 1992 by MAURO, DANILO and ROBERTO BEATRICI, three brothers with a solid formation and several years of professional experience in the production of insulated panels, machines for controlled atmosphere, Installation of insulated panels for coverages and facades, refrigerated warehouses and cooling systems.

TREBI LTD started its activity as partner for different producers and final consumers. The firm provided the installation of prefabricated elements for the realization of refrigerated cells and cold stores.

The company grew constantly over the following years and now offers only top-quality and complete services in each of the realization phases. **From the planning, to the selection of raw materials, up to the delivery, assembling and after sales assistance**

·
Â

- refrigerated cells
- seasoningÂ cells
